## Thermal Body Temperature Monitoring Solution

### High Accuracy

Temperature Monitoring Accuracy  
 $\pm 0.3^{\circ}\text{C}$

### High Efficiency

Efficiency improved by 800%

### Safe & Contactless Measurement

Measurement up to 3m

### Intelligent Analysis

Face mask detection accuracy >95%

### Multi-target Management

Up to 30 targets detected at the same time

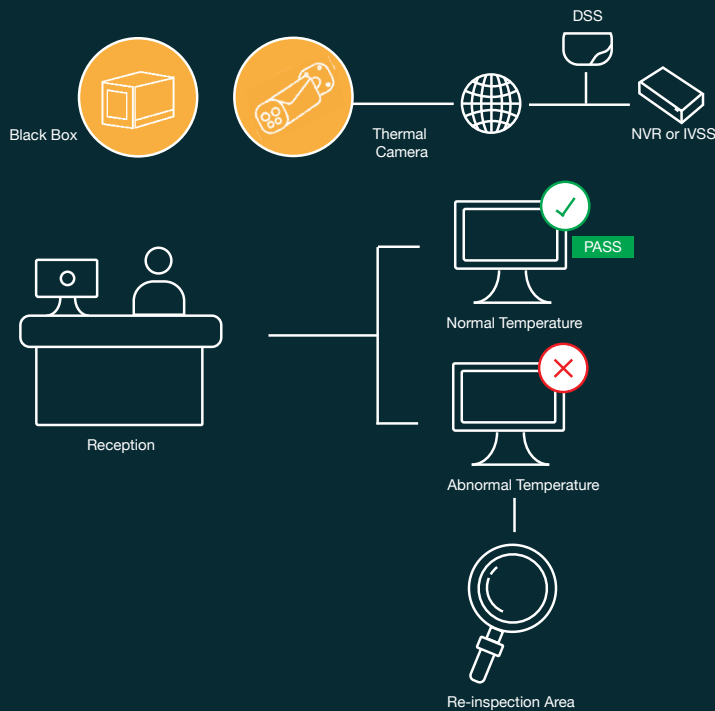

### Flexible to Deploy

Rapid Installation & flexible deployment

# changeconnect

## Overview

Change Connect are proud to present a highly accurate body temperature monitoring solution. Accurate to within  $\pm 0.3^{\circ}\text{C}$  with a black box it also features a built in AI algorithm for multi-person measurements up to 3metres enabling fast, non-contact access.

- **High Accuracy:**  
Temperature Monitoring Accuracy  $\pm 0.3^{\circ}\text{C}$
- **High Efficiency:**  
Efficiency improved by 800%
- **Safe & Contactless Measurement:**  
Measurement up to 3m
- **Multi-target Measurement:**  
Up to 30 targets detected at the same time
- **Intelligent Analysis:**  
Face mask detection accuracy  $>95\%$
- **Flexible to Deploy:**  
Rapid Installation & flexible deployment

Featuring a fixed lens bullet camera, this series provides an all in one solution that is beneficial for temperature control.

Black body is the calibration device that maintains a constant temperature as a reference point for the thermal camera, to make sure the thermal camera can present the most accurate temperature. The thermal camera coupled with the blackbody calibration device delivers a contactless solution for continuous, contactless, and non-invasive temperature monitoring.
